Prepared to perform. Equipped for the long haul.

OnPointsm business aviation solutions for CF34* engine-powered
Lineage 1000[®] aircraft operators

ge.com/aviation

Overview

GE OnPoint service and support solutions for the Lineage 1000® aircraft offer peace of mind to today's business aircraft operator.

With resources and capabilities available from your engine OEM, GE provides a complete OnPoint solution to keep your aircraft in flight. Predictable budgeting and tools can help you retain your aircraft's resale value, enabling you to better control your investment.

Budget simplification

- predictable maintenance costs
- comprehensive coverage

Peace of mind

- simplified logistics
- increased aircraft availability

Secure investment

- enhanced OEM-managed engine value
- increased aircraft resale value

OnPoint solutions covers:

- Scheduled and unscheduled engine-caused maintenance, including: labor, material, vendor repair, test and line replaceable unit (LRU) repair
- Recommended Service Bulletins
- Lease-engine(s), including removal and reinstallation
- Transportation of installed and lease engines
- Overhaul, repair and/or exchange of LRUs
- All life-limited parts (LLPs)
- Comprehensive Diagnostics with immediate notification and quarterly reports
- Up to 50 hours annually for line maintenance labor
- Filters, o-rings, etc., for Chapter 5 inspections
